ATS-Optimized Professional Summary

Results-driven AI/ML Engineer and Software Engineer with 3+ years of experience in designing, building, and deploying scalable machine learning models and robust MLOps pipelines. Proficient in Python, deep learning frameworks like PyTorch and TensorFlow, and skilled in developing solutions leveraging LLMs for complex data problems. Adept at collaborating with cross-functional teams to translate business requirements into high-performance, production-ready AI models and real-time APIs for global enterprise platforms.

High-Impact Experience Bullet Points

Software Engineer | TechSolutions Inc.

June 2024 – Present | Remote

- Architected and **deployed** critical enterprise **solutions**, including responsive web applications using React, TypeScript, and FastAPI, serving 25,000+ monthly active users; **collaborated** with product teams to integrate analytical **models** and improve user engagement by 15%.
- Engineered and **deployed** automated data processing pipelines in Python, adhering to **MLOps** best practices and integrating **model** tracking with **MLflow** for robust **version** control, which reduced report generation latency by 45% and supported the development of predictive **models**.
- **Collaborated** with cross-functional engineering teams in an Agile environment to design and **deploy** scalable microservices and integrate new feature **solutions**, including early-stage experimentation with **deep learning models** for enhanced feature capabilities.

Full Stack Developer | Innovate Labs

August 2022 – May 2024 | Bangalore, India

- Developed and **deployed** secure, high-performance RESTful APIs and modern frontend interfaces using Node.js, Express, and React, supporting various **solutions** for a growing user base.
- Implemented robust user authentication, role-based access control (RBAC), and session handling, while also contributing to infrastructure automation for efficient **model deploy**ment readiness.

Core Technical Skills

- **Programming Languages**: Python, JavaScript, TypeScript, SQL
- **Machine Learning & AI**: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Deep Learning, LLMs (Large Language Models), Prompt Engineering
- **Web Frameworks & Libraries**: React.js, Next.js, Node.js, FastAPI, Flask
- **Databases**: PostgreSQL, MySQL, MongoDB, SQLite
- **MLOps & DevOps**: MLflow, Git, Docker, Linux/Bash, GitHub Actions, CI/CD, REST APIs, Postman, Version Control
